Chapter 1 exam brief

ماذا يطلب الكورس أوت لاين من الفصل الأول — اقرأ هذا أولًا

This set merges **Dr. Amani Al-Rubkhi's Fall 2026 notes** (the course coordinator) and **Dr. Ahmed Al-Hadhrami's Spring 2024 slides** into one source. Every definition, example and activity from both decks appears exactly once and is tagged with its source. Where the decks disagree, Dr. Amani's version comes first, and the reason is given.

CHAPTER 1 IN THE FALL 2026 SCHEDULE

WEEK	LECTURES	LAB (R)	ASSESSMENT / EXERCISES
1	0-0 Course overview · 1-1 Descriptive and Inferential Statistics · 1-2 Variables and Types of Data · 1-3 Data Collection and Sampling Techniques	Lab 1: Get RStudio! · Get started with R! · R Project · R Markdown	Exercises Chapter 1, **page 34: {6, 22, 39, 42}** + Moodle exercises
4	—		**In-Class Quiz I** (Chapters 1–3)
8	—		**Midterm** 25% · 3/11/2026 · Chapters 1, 2, 3, 4

The outcome Chapter 1 is graded against: CLO1

CRITERION	"TO ACHIEVE THIS OBJECTIVE, THE STUDENT MUST…" (VERBATIM)	LESSON
CLO1-A	Define essential statistical terminology, including descriptive statistics, inferential statistics, sample, population, parameters, and statistics.	1-1 (parameters and statistics: 3-1)
CLO1-B	Differentiate between qualitative and quantitative data and classify data according to levels of measurement.	1-2
CLO1-C	Identify various data sources and assess appropriate sampling techniques.	1-3

Assessed by **Tutorial questions + In-Class Quiz + Midterm + Final**.

HOW CHAPTER 1 IS ACTUALLY EXAMINED

Almost nothing here is calculation. The marks come from **classification under ambiguity**: a scenario is described and you name the branch (descriptive or inferential), the variable type, the level of measurement, or the sampling method, *and justify it in one line*. The questions are built around the borderline cases: a numeric ID (qualitative), money (discrete in Bluman), calendar year (interval, not ratio), "all teachers from two buildings" (cluster, not stratified). Each lesson here ends its main ideas with those borderline cases. The two calculations are the random-number-table SRS and the systematic sampling interval k.

الخلاصة بالعربي

الفصل الأول يُدرَّس في **الأسبوع الأول**، ويخدم مخرج التعلم **CLO1** بفروعه الثلاثة: (A) تعريف المصطلحات، (B) تصنيف المتغيرات ومستويات القياس، (C) طرق جمع البيانات والمعاينة. الأسئلة غالبًا **تصنيف مع تبرير**، وليست حسابًا. لذلك ركّز على الحالات الحدّية التي يُبنى عليها السؤال، مثل الرقم الجامعي (وصفي رغم أنه رقم)، والسنة (فتري وليس نسبيًا)، و«كل المعلمين في مبنيين» (عنقودية وليست طبقية). التمارين المطلوبة من الكتاب: صفحة 34، الأسئلة **6 و 22 و 39 و 42**.

Where the two decks differ, and what to write

#	POINT	WHAT TO DO
1	**Systematic sampling, rounding k.** Dr. Amani: round k **down** (86/6 = 14.33 → 14). Dr. Ahmed: 86/6 = 14.33 → **15**.	Round **down**. With k = 15 and a random start of 15, only five trees fit before tree 86 (15, 30, 45, 60, 75), so the sample comes up short. With k = 14, every start from 1 to 14 reaches six trees. Lesson 1-3 has the diagram.
2	Example 1-3 (a): the slide prints the boundaries of 17.6 in as `17.55–18.55` .	Typo. The correct answer is `17.55–17.65` : half of the last decimal place, 0.05, each way.
3	The SRS example in Dr. Amani's notes leaves the class size N blank.	The procedure is solved fully in 1-3 with N = 65, and Dr. Ahmed's laptop version (N = 4998) is solved too. The steps don't depend on N.
4	Data collection methods, biased samples, convenience and volunteer samples, sampling and nonsampling error, Example 1-1/1-2/1-4 and the review exercises appear only in Dr. Ahmed's deck.	All included. They are in the textbook (Bluman 10e) named in the outline, so treat them as examinable.
5	Dr. Amani lists GPA as continuous; Dr. Ahmed lists GPA, exam marks and age as ratio.	No conflict: those answer two different questions. GPA is quantitative, continuous, and at the ratio level.

Chapter 1 study set: 7 files. One merged source built from Dr. Amani Al-Rubkhi's Fall 2026 notes (course coordinator) and Dr. Ahmed Al-Hadhrami's slide pack, aligned to the SQU STAT 2101 course outline (Fall 2026). Textbook: Bluman, *Elementary*
